ABOUT ME

I'm Amaan Memon, a Web Developer skilled in Shopify, React/Next.js & WordPress. I love building clean, fast & animated web experiences that users actually enjoy.

Currently working at The Second Wheel, previously at Jilani Tech. I've worked on E-commerce stores, business sites, AI-powered automation systems & internal tools.

My goal is simple — smart UI + automation + performance. I enjoy solving complex problems, building automation systems, and creating things that actually help businesses grow.

EDUCATION

2021 - 2022 GUJARAT BOARD | SECONDARY SCHOOL

Completed 10th standard under Gujarat Board with good academic performance. Developed discipline, communication, and problem-solving habits during school years.

2023 - 2024 GUJARAT BOARD | HIGHER SECONDARY SCHOOL (COMMERCE)

Completed higher secondary education in commerce stream with focus on accounting and business fundamentals. Built strong understanding of finance, economics and commercial concepts.

WORK EXPERIENCE

APR 2024 - DEC 2024 | JILANI TECH | APPLICATIONS AND WEBSITE DEVELOPER

Managed databases for secure and efficient web applications. Built scalable platforms using React, Next, Angular, and Ionic, and designed websites for e-commerce and education.

DEC 2024 - PRESENT | THE SECOND WHEEL | WEB DEVELOPER

Designed and developed responsive websites with focus on clean UI/UX and performance. Worked with databases, APIs, and modern web technologies to deliver smooth user experience.

PROJECTS

AI-Powered Complaint Automation System

Tech Stack: React.js, Node.js, Tailwind, Express, MongoDB, Google Vision OCR, OpenAI API, JWT, RBAC

- Complaint image → OCR → AI analysis → auto-department tagging with summary generation.
- Extracted user details (name, phone), auto categorization, analytics dashboard.
- Role-based access (L0/L1/L2), user management.

Custom Cart Drawer with Milestone Bar – Shopify

Tech Stack: Liquid, JavaScript, CSS

- Custom cart drawer with milestone progress discount bar.
- Real-time cart updates, discount auto-calculation, smooth animations.

Custom Bundle Pages – Shopify

Tech Stack: Liquid, JavaScript, UI/UX

- Custom bundle builder with drag-and-drop UI.
- Dynamic pricing, quantity control, save bundle functionality.

Custom Product Page Development – Shopify

Tech Stack: Liquid, JavaScript, CSS

- Variant selection, zoom gallery, dynamic pricing, recommendations.
- Added size guide & interactive UI for better conversions.

Custom Collection Page Development – Shopify

Tech Stack: Liquid, JavaScript, Filter System

- Advanced filters (price/size/color/brand), sorting, infinite scroll.
- Filter persistence with URL params.

Node.js WhatsApp & Email Automation – Shopify App

Tech Stack: Node.js, Shopify API, WhatsApp API, Email API, Webhooks

- Automated order updates, confirmations & promotional messages.
- Real-time webhook event handling.

Birthday Gift Automation System – Shopify

Tech Stack: Node.js, Shopify API, Cron Jobs

- Auto-generate free gift orders on customer birthdays.
- Email notifications + membership tier handling.

PROJECTS

Payment Gateway Integration

Tech Stack: Node.js, Razorpay, Stripe, Shopify API, Webhooks

- Secure payments, refund handling, order status tracking.

Admin Panel Development

Tech Stack: React.js, Next.js, RBAC, API Integration

- Dashboard, user management, bulk operations, CRUD, analytics.

Data Visualization Dashboard

Tech Stack: React.js, Next.js, Chart Libraries

- Custom charts, widgets, filtering, real-time analytics.

File Upload & Management System

Tech Stack: React.js, Next.js, AWS S3/Cloudinary

- Drag-drop, compression/resizing, uploads with progress UI.

API Integration Projects

Tech Stack: REST, GraphQL, React Query/SWR

- Caching, retry logic, loading states, real-time data fetch.

React Web Application

Tech Stack: React.js, Bootstrap, Redux/Context

- Component library, form validation, lazy loading.

Scheduled Task Automation

Tech Stack: Node.js, Cron Jobs

- Reports, data sync, emails, backups with logging.

WordPress Custom Design & Animations

Tech Stack: Elementor, CSS, JS

- Custom post types, parallax, animation heavy UI.

Ionic Angular Mobile App

Tech Stack: Ionic, Angular, Push Notifications

- Cross-platform app with offline support and native features.
